## **DETAILED ACTION**

### ***Response to Amendment***

1. In response to the Office Action, mailed July 18, 2007, applicant did not respond, which led to a Notice of Abandonment, mailed March 6, 2008. Applicant then filed a Petition to Revive on May 18, 2009, along with an Amendment and Remarks. The Amendment cancelled claims 1-5, 8-11, 13-15 and 26; amended claims 18-19, 23-25, 27, and 34; and added new claims 36-47. The petition being granted on June 19, 2009, the revived application was forwarded to the examiner on July 8, 2009.

With the Examiner's Amendment to the Title, next, the claim amendments have placed the pending claims in position for allowance, for reasons given below.

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

#### **In the Title:**

After "Noise Suppression" insert -- **by Two-Channel Tandem Spectrum**

#### **Modification—**

#### **In the Claims:**

Cancel withdrawn claims 29-33 and 35.

***Allowable Subject Matter***

3. Claims 16-21, 23-28, 34, and 36-47 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

4. As to independent claims 16 and 34, Widrow et al. and Deligne et al. (the closest prior art of record) do not teach nor fairly suggest a two-stage noise cancellation system or method consisting of a first noise suppression unit configured to process the first and second signals based on a two-channel spectrum modification technique to suppress the correlated undesired component in the first signal, in tandem with a second noise suppression unit configured to suppress the uncorrelated remaining undesired component in the first signal based on a single-channel spectrum modification technique.

Dependent claims 18, 37-47 are allowed because they further limit independent claim 16 or their parent claims.

5. As to independent claims 17 and 36, Widrow et al. and Deligne et al. do not teach nor fairly suggest a two-stage noise cancellation system or method consisting of a first noise suppression unit configured to process the first and second signals based on a two-channel spectrum modification technique to suppress the correlated undesired component in the first signal, in tandem with a second noise suppression unit configured to suppress the uncorrelated residual undesired component in the first signal.

Dependent claims 19-21, 23-25, and 27-28 are allowed because they further limit

independent claim 17 or their parent claim.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
